

UCSD DRONE HIGHLIGHTS

How the University Captured
New Campus Features

THE OPPORTUNITY

UC San Diego needed a birds-eye-view to highlight its new trolley station and the grand opening of Epstein Amphitheater.

Given the complexity of flying at night near large crowds, UCSD required a licensed, insured drone operator with a strong focus on safety and campus compliance, all while capturing cinematic footage.

THE SOLUTION

Matt worked directly with UCSD's Drone Program Manager, Eric Delucien, to get flight plans approved and coordinate safe airspace use. For the event, he launched from a rooftop to maintain clear line of sight, ensuring visual precision and public safety

RESULTS

01

New Content

Footage delivered to UCSD's Creative & Digital Strategies team

02

Informative

Used in Instagram reels and other social media content

03

Marketing

Added to campus video library for ongoing marketing use

04

Key Highlight

Hyperlapse shot of the new trolley and amphitheater in action
